

CeFC FREE MEDICAL CAMP REPORT

Venue: Christ Ekklesia Fellowship Chapel, Kabarak, Nakuru

Wednesday, 24th June 2026

EXECUTIVE SUMMARY

The Home of Light & Love Foundation, in partnership with **Bloom Hospital** and **Tabenacle Widows Home**, successfully conducted a Free Medical Camp at **Christ Ekklesia Fellowship Chapel (CeFC), Kabarak, Nakuru** on **Wednesday, 24th June 2026**. The camp was hosted by CeFC, whose church hall served as the venue and whose leadership played an integral role in the day's success.

A total of **113 community members** received free medical services including consultations, screenings, treatment, and health education. **5 ENT cases, 1 cataract case**, and **7 additional specialist bookings** were identified for continued care.

Most significantly, this camp marked a **historic milestone** for the Foundation — it was the **first camp where evangelism and a Pastoral Care Desk were successfully integrated** alongside the free medical services, a vision the Foundation has been working toward since its first camp. A team of **5 ministers from the United States**, invited by CeFC and led by **Pastor David & Rachael Kituyi**, led the Pastoral Desk. **One soul gave their life to Christ** on this day.

Restoring Hope Daily — one community at a time.

1. EVENT DETAILS

Date	Wednesday, 24th June 2026
Time	8:00 AM – 3:00 PM

Venue	Christ Ekklesia Fellowship Chapel, Church Hall, 500M from ChapChap, Near Pink House, Kabarak, Nakuru
Host	Christ Ekklesia Fellowship Chapel (CEFC)
Organizing Foundation	Home of Light & Love Foundation
Medical Partner	Bloom Hospital
Community Partner	Tabenacle Widows Home
Pastoral Desk Leaders	Pastor David & Rachel Kituyi (<i>led a team of 5 from the USA</i>)

2. SERVICES OFFERED

- General Consultations
- Gynecology Check-Up
- Eye Check-Up
- ENT Check-Up
- Urology
- Blood Pressure & Sugar Testing
- Health Education & Counseling
- **Pastoral Care & Spiritual Support** (*integrated for the first time*)

3. PARTICIPATION & STATISTICS

Total Patients Attended To: 113

Outcome	Count
Total patients seen	113
ENT cases identified & referred	5
Cataract cases identified	1
Additional specialist bookings	7
Souls saved at the Pastoral Desk	1

4. ACTIVITIES CONDUCTED

a) Medical Outreach

Community members received free screening, diagnosis, treatment, and essential medicines across all service areas, delivered by Bloom Hospital's multidisciplinary medical team.

b) Pastoral Care Desk — A Historic First

For the first time in the Foundation's medical camp history, a fully structured **Pastoral Care Desk** was operational throughout the camp. Led by **Pastor David & Rachel Kituyi** alongside a team of 5 ministers visiting from the United States, the desk was positioned such that **no patient was allowed to leave the camp after seeing a doctor without first stopping at the Pastoral Desk**. At the desk, each patient received prayer, encouragement, and emotional support as needed. One patient gave their life to Christ — the first recorded salvation at a Foundation medical camp.

c) Evangelism Teams

Two evangelism teams of three members each were deployed in the surrounding community during the camp, extending the Foundation's spiritual outreach beyond the camp grounds.

d) Health Education

Community sensitization on hygiene, nutrition, preventive health, and wellness was conducted alongside medical services.

5. OUTCOMES & IMPACT

- **113 community members** received free medical services they would otherwise have had to pay for
- **5 ENT cases** identified and referred for specialist care at Bloom Hospital
- **1 cataract case** identified and booked for further management
- **7 specialist bookings** made for patients requiring continued care
- Every patient passed through the **Pastoral Care Desk** — receiving prayer, encouragement, and spiritual support

- **1 soul saved** — a first for the Foundation's medical camp ministry
- Two community evangelism teams reached residents beyond the camp venue
- The integration of medical care and spiritual outreach was demonstrated as a fully workable and replicable model

6. A MILESTONE WORTH MARKING

This camp answered a question the Foundation has been asking since Tenges: *Can we heal the body and touch the soul in the same space, on the same day?* The answer, as of 24th June 2026, is **yes**.

The Pastoral Care Desk was not a disruption to the medical work. It was its completion. Every patient who walked out of that church hall on Wednesday walked out having been seen by a doctor **and** prayed over by a pastor. That is the full picture of what the Home of Light & Love Foundation exists to do — and it was done.

One soul came to Christ. In eternity, that number is everything.

7. CHALLENGES FACED

i. Limited Community Mobilization

Turnout, while meaningful, was lower than the venue's potential. Advance community mobilization was insufficient, and a stronger pre-camp engagement with local chiefs, schools, and community networks would have driven higher attendance.

ii. No Dedicated Foundation Media Team

The Foundation once again relied on the hosting church for photography. As a result, no video testimonials were collected from patients, the Pastoral Desk, or the evangelism teams — a significant missed opportunity given the historic nature of this camp.

8. RECOMMENDATIONS & CONCLUSION

On Strengthening the Pastoral Care Desk:

The Pastoral Care Desk proved its value beyond any doubt on this day. Going forward, it must be strengthened, not scaled back. Specifically:

- Where possible, **all available pastors should be present and active at the desk** — not just one or two
- Beyond prayer, the desk should create space for pastors to **speak to emotional and physical wellbeing** as the Holy Spirit leads — addressing grief, anxiety, loneliness, and the deeper burdens that people often carry silently into a medical camp
- Every patient who has not yet received Jesus Christ as Lord and Saviour should be gently and warmly led to that decision
- **Pastors at the desk must submit a brief report after each camp** recording the number of salvations, the number of people prayed with, and any notable spiritual encounters — this data feeds the Foundation's discipleship follow-up and long-term impact records
- Those who give their lives to Christ should be connected to a local church for follow-up and discipleship

On Media & Video Testimonials:

A dedicated Foundation media volunteer must be assigned to every camp without exception. For future camps of this significance — especially those featuring the Pastoral Desk — **short video testimonials from patients, salvations, and volunteers** are invaluable for donor engagement, social media impact, and institutional memory. This must become standard practice.

On Community Mobilization:

The pre-camp checklist — including chief notification, church announcements, school engagement, and community health volunteer briefings — must be completed at least **2 weeks before** every camp. No camp should proceed without it.

9. CONCLUSION

The Kabarak camp will be remembered not just for the **113 lives touched medically**, but for the day the Foundation proved that healthcare and the Gospel can walk hand in hand into a community and leave it better in every way. Bodies were screened. Conditions were diagnosed. Referrals were made. And one person — one soul — went home knowing Jesus Christ for the very first time. That is the mission. That is the vision. That is what the Home of Light & Love Foundation is built for.

The body is healed. The soul is touched. Hope is restored.

Restoring Hope Daily. 🙏
