

TIMBOROA FREE MEDICAL CAMP REPORT

Venue: Timboroa Chief's Office, Timboroa

Date: Saturday, 25th July 2026

EXECUTIVE SUMMARY

The Home of Light & Love Foundation, in partnership with **Bloom Hospital** and **Tabenacle Widows Home**, successfully conducted a Free Medical Camp at **Timboroa Chief's Office** on **Saturday, 25th July 2026**. The camp was hosted by **Hon. Mathew Kibet "Fighter"**, MP Aspirant, Eldama Ravine Constituency and Community Advocate.

A total of **205 community members** were attended to and received free medical services — making this one of the highest-turnout camps the Foundation has conducted. **1 cataract case** and **1 ENT case** were identified and booked for specialist follow-up care at Bloom Hospital.

Restoring Hope Daily — one community at a time.

1. EVENT DETAILS

Date	Saturday, 25th July 2026
Time	8:00 AM – 3:00 PM
Venue	Timboroa Chief's Office, Timboroa
Host	Hon. Mathew Kibet "Fighter" — MP Aspirant, Eldama Ravine Constituency
Organizing Foundation	Home of Light & Love Foundation
Medical Partner	Bloom Hospital
Community Partner	Tabenacle Widows Home

2. SERVICES OFFERED

This camp featured an expanded set of services beyond the Foundation's standard offering:

- Blood Pressure Screening
- Diabetes Screening
- Breast Cancer Screening
- Thyroid Screening
- Prostate Screening
- Deworming
- Distribution of Sanitary Pads

3. PARTICIPATION & STATISTICS

Total Patients Seen	205
Cataract Cases Booked	1

4. ACTIVITIES CONDUCTED

a) Medical Outreach

Bloom Hospital's multidisciplinary medical team delivered a full day of free screening, diagnosis, and treatment across an expanded range of services. With 205 patients served, the medical team operated at full capacity from morning to close.

b) Sanitary Pad Distribution

In keeping with the Foundation's commitment to the dignity of women and girls, sanitary pads were distributed to female beneficiaries during the camp.

c) Specialist Referrals & Bookings

Patients identified with conditions requiring advanced care — including 1 cataract case and 1 ENT case — were booked for specialist follow-up at Bloom Hospital at no cost to the patients.

5. OUTCOMES & IMPACT

- **205 community members** received free medical services — one of the highest attendance figures in the Foundation's camp history
- Expanded screening services — including breast cancer, thyroid, diabetes, and prostate — gave the Timboroa community access to checks that are rarely available to them
- **1 cataract patient** and **1 ENT patient** booked for specialist care at Bloom Hospital

- Sanitary pads distributed to women and girls, supporting menstrual health and dignity
- Hon. Mathew Kibet "Fighter's" hosting and community networks contributed significantly to the strong turnout

6. NOTABLE OBSERVATION

This camp introduced **an expanded service menu** beyond what the Foundation has offered at previous camps — adding Breast Cancer Screening, Thyroid Screening, Prostate Screening, Diabetes Screening, and Deworming. The strong turnout of 205 patients suggests that when the right services are offered in the right community with the right mobilization, the demand is enormous.

This is a model worth building on.

7. CHALLENGES & RECOMMENDATIONS

On the Pastoral Care Desk:

It is not confirmed whether a Pastoral Care Desk was operational at this camp. Given the record-level attendance of 205 patients, the absence of a Pastoral Desk — if that was the case — represents a significant missed opportunity. **205 people passed through these doors. Each one carried more than a physical ailment.** The Foundation must ensure the Pastoral Care Desk is a non-negotiable feature at every future camp, regardless of who is hosting.

On Media Documentation:

As has been the case at several previous camps, the Foundation's media capacity on the ground must be strengthened. A dedicated Foundation media volunteer must be present at every camp to capture photos, short video clips, and patient testimonials independently.

On Expanded Services:

The Timboroa camp demonstrated the value of offering a broader range of health screenings. The Foundation should work with Bloom Hospital to **standardize an expanded service package** — particularly including cancer

screenings, thyroid, and diabetes checks — for communities where these conditions are prevalent and underdiagnosed.

8. CONCLUSION

205 people. In one day. At a Chief's Office in Timboroa.

People came for blood pressure checks. For diabetes screening. For breast cancer screening — services they would never otherwise access. They came, and they were served.

The Home of Light & Love Foundation, together with Bloom Hospital, Tabenacle Widows Home, and Hon. Mathew Kibet "Fighter", showed Timboroa that a healthy community is indeed a strong community.

Restoring Hope Daily.
